

MONSTER MOSQUITO

HOUSTON - The Houston Angel Network (HAN) is pleased to announce a new round of investment in Monster Mosquito Systems. Established in 2004, Monster Mosquito has developed an all-natural do it yourself mosquito repellent system. Monster's patented technology contains no DEET or insecticides so the repellent is safe for use around people, pets and food. This round of investing by HAN members will be used to continue to build inventory and create newer models of the device. Retail partners such as The Home Depot, Costco, Terminix, Frontgate and QVC sell Monster Mosquito products.

"The founding team at Monster Mosquito Systems has managed through adversity without missing a beat, said HAN member and investor John Filla. "They take advantage of unique market opportunities for the company whenever possible. They have a relentless commitment to building value for investors under all market conditions. This is a great example of what a startup's management can achieve when you begin with the right experience base and an appreciation of the long game."

Don Knudsen, President of Monster Mosquito Systems was appreciative of the long term relationship with HAN, "We have enjoyed a very positive relationship with this group. Based on our experience HAN is the best angel investment group in Texas."
